## ⌘ IPA BINARY CODE ANALYSIS

HIGH: 0 | WARNING: 2 | INFO: 1 | SECURE: 0 | SUPPRESSED: 0

NO	ISSUE	SEVERITY	STANDARDS	DESCRIPTION
1	Binary makes use of insecure API(s)	warning	<b>CWE:</b> CWE-676: Use of Potentially Dangerous Function <b>OWASP Top 10:</b> M7: Client Code Quality <b>OWASP MASVS:</b> MSTG-CODE-8	The binary may contain the following insecure API(s) <code>_fopen</code> , <code>_memcpy</code> , <code>_sscanf</code> , <code>_stat</code> , <code>_strcpy</code> , <code>_strlen</code> , <code>_strncat</code> , <code>_strncpy</code> , <code>_vsprintf</code>
2	Binary makes use of Logging function	info	<b>CWE:</b> CWE-532: Insertion of Sensitive Information into Log File <b>OWASP MASVS:</b> MSTG-STORAGE-3	The binary may use <code>_NSLog</code> function for logging.
3	Binary makes use of malloc function	warning	<b>CWE:</b> CWE-789: Uncontrolled Memory Allocation <b>OWASP Top 10:</b> M7: Client Code Quality <b>OWASP MASVS:</b> MSTG-CODE-8	The binary may use <code>_malloc</code> function instead of <code>calloc</code>

## IPA BINARY ANALYSIS

PROTECTION	STATUS	SEVERITY	DESCRIPTION
NX	True	info	The binary has NX bit set. This marks a memory page non-executable making attacker injected shellcode non-executable.
PIE	True	info	The binary is build with <code>-fPIC</code> flag which enables Position independent code. This makes Return Oriented Programming (ROP) attacks much more difficult to execute reliably.
STACK CANARY	True	info	This binary has a stack canary value added to the stack so that it will be overwritten by a stack buffer that overflows the return address. This allows detection of overflows by verifying the integrity of the canary before function return.
ARC	True	info	The binary is compiled with Automatic Reference Counting (ARC) flag. ARC is a compiler feature that provides automatic memory management of Objective-C objects and is an exploit mitigation mechanism against memory corruption vulnerabilities.
RPATH	True	warning	The binary has Runpath Search Path ( <code>@rpath</code> ) set. In certain cases an attacker can abuse this feature to run arbitrary executable for code execution and privilege escalation. Remove the compiler option <code>-rpath</code> to remove <code>@rpath</code> .
CODE SIGNATURE	True	info	This binary has a code signature.
ENCRYPTED	False	warning	This binary is not encrypted.

PROTECTION	STATUS	SEVERITY	DESCRIPTION
SYMBOLS STRIPPED	False	warning	Debug Symbols are available. To strip debugging symbols, set Strip Debug Symbols During Copy to YES, Deployment Postprocessing to YES, and Strip Linked Product to YES in project's build settings.

**Description:**

MapSpoto – Discover Activities Near You Discover activities around you and connect with people in your local community. Whether you're looking for casual meetups, group events, or shared interests, MapSpoto helps you find and create meaningful local experiences. MapSpoto is a location-based platform where you can explore nearby activities, join events that match your interests, and communicate with others directly within the app. What you can do: • Discover activities and events happening near you • Create and organize your own local events • Join activities that match your interests • Connect and chat with other participants • Share updates related to your activities • Block and report users or content for a safe experience Your location is used only to show relevant nearby activities. We do not share your real-time or exact physical location with other users. MapSpoto is designed to encourage real-world connections while giving you full control over your privacy and safety. Start exploring your community today.
